Mentor Program

Nobel Biocare AG, the world leader, with 40 years of experience as a dental implant company, and which is building up in Hungary the so-called mentor-net, is now working successfully in other Western-European countries. With major professional appreciation (and with challenges and responsibilities to live up to expectations) we have become the only mentor centre of Southern-Hungary, being involved in five counties.

Our missions:

- Implant courses, further education for dental surgeons (every month).
- Individualized practical instruction for beginning implant surgeons.
- Collaboration with other implant surgeons on complicated cases.
- Providing implantation opportunities for the patients of dentists without implantation experience.
- Up-to-date knowledge of implantology, and further instruction in this regard.
- The instructional introduction of surgeries.
- Constant consultations regarding dental implantology and prosthesis for dental surgeons and dentists.

Miss Universe Hungary

The Miss Universe and Miss World Hungary Organisation asked our team to prepare the winners in a dental sense for international contests. In 2005, Szandra Proksa (Miss Universe, Hungary) and Tünde Semmi-Kis (Miss World, Hungary) were treated at one of our centres.

A Nobel Biocare Branemark Implant Reference:

In 1965, twelve Nobel Biocare Branemark implants in prosthesis were put into Swedish taxi driver Gösta Larsson's mouth – and he still chews and smiles with it.

DENTAL IMPLANTATION **10** YEARS GUARANTEE

Zimmer Implants Reference:

Kelly Butaris – Recipient of an individual implant in lieu of a conventional bridge.

Betty Langley – Opted for a fixed-partial denture restoration in lieu of a removable partial denture.

Bill Smith – Benefited from an implant-supported denture in lieu of traditional dentures.

Testimonials:

“Dear Zsolt,

First of all, thank you for devoting your entire day to me. I’ll admit, honestly, that your professionalism fascinated regarding your carrying out all the required treatment.

This was the first dental prosthesis that I did not have to spend time getting used to, and I could eat and talk within the next few hours, just as if it had always been my own...

According to my colleagues (ladies who really “have an eye” for me), the effect is that it is totally natural.

Thank you very much for all you have done.”

Csaba Sz. - Nagykáta

“I’m writing you to say thank you for all your work and care. I have never had such an experience and pain-free treatment before. It has been a lot more relaxing going to your clinic than I had thought. Sopron was beautiful - and I came home with many memories, smiling happily, and feeling liberated...”

Markus B. - Munich

"I can't thank you enough for what you have done for me! With a grateful heart, I think of the dentists and of those helping their work, who have managed to do away with the anguish and stigma I have had up to now owing to the deficiencies of my teeth... I wish this fantastic team lots of success and outstanding health for their excellent work..."

Mary K. - London
