DENTAL IMPLANTATION **10** YEARS GUARANTEE

Implant centre in Sopron

We opened our clinic in 1996 with the idea of establishing an implant centre in Sopron, one that offered high-standard services and where patients could find medical treatments for all kinds of illnesses and problems of the mouth and surrounding areas.

At the heart of Sopron city centre we make our visitors welcome in an elegant, familiar environment, with air-conditioned consulting-rooms and exceptional, personal care.

The three-seat dental centre is equipped with state-of-the-art technology, such as an Elexxion – computer controlled dental laser, Orthophos – a panoramic x-ray system, with Piezosurgery – ultrasound scan surgical equipment, a 3-dimensional computer program for precise, accurate intervention planning, and also with the latest CAD/CAM metal-free, titanium technology to deal with crowns and bridges.

We provide the whole range of dental treatment choice, from simple extractions through to traditional and cosmetic dentistry, to the most complicated implantations, all with an emphasis on aesthetics.

The treatment of our patients takes place under the well-coordinated concern of the clinic's internationally experienced, English-speaking dental surgeons and personnel, who will concentrate on the interests and wishes of our visitors.
